=====

***Program Description***

This project aims to remove water hyacinths that block the waterways in the city and neighboring places while providing LIVELIHOOD TRAINING with water hyacinths as the main component of the program. The project promotes the water hyacinth handicraft making and weaving activities.

***Rationale***

The environment is everybody’s concern. The continuity of life is dependent on life-giving and enhancing factors present in the environment. Environmental issues and concerns of our present environment pose a vital threat to the people of Mindanao in general.

Mindful of this, this activity aims to create livelihood opportunities while we save our environment.

***General Objective***

To provide livelihood opportunities for unemployed mothers and Out of School Youth at their puberty ages through water hyacinth weaving and handicraft.
